

OVVO® Permanent & Releasable Connector Technical Information

Virutex AB181 OVVO Hand Tool Also Available From NEY

A revolutionary invisible furniture fitting for the ready to assemble / flat-pack woodworking industry.

New assembling system

The OVVO connection system not only cuts down on assembly time but also allows furniture to be flat packed saving time and space. Once slots are routed it is not necessary to use any further tools, screws or glue to assemble the pieces. The OVVO connection system is a three piece jointing system available as a releasable or permanent solution.

Invisible and detachable

The action is simplicity itself, all you have to do is press them together and wait for the 'click' which indicates that the joint has seated. This invisible solution, with an internal automatic clamp, creates a perfect union between work pieces.

The OVVO® connectors system allows a variety of joints and angles.
